

# Prefilled ApiJect Injector\* – 0.5mL Delivery

## Prototype Design Overview: Bravo

### Needle Hub\* and Connector

#### Raw Materials

- 1) Polypropylene (PP)
- 2) Cannula

#### Manufacturing Process

- Plastic Injection Molding
- Sterility Sealed Separately

#### Quantity

- Per partner's specifications

*Supplied by ApiJect*

### Blow-Fill-Seal Container

#### Raw Materials

- 1) Low-Density Polyethylene (LDPE)

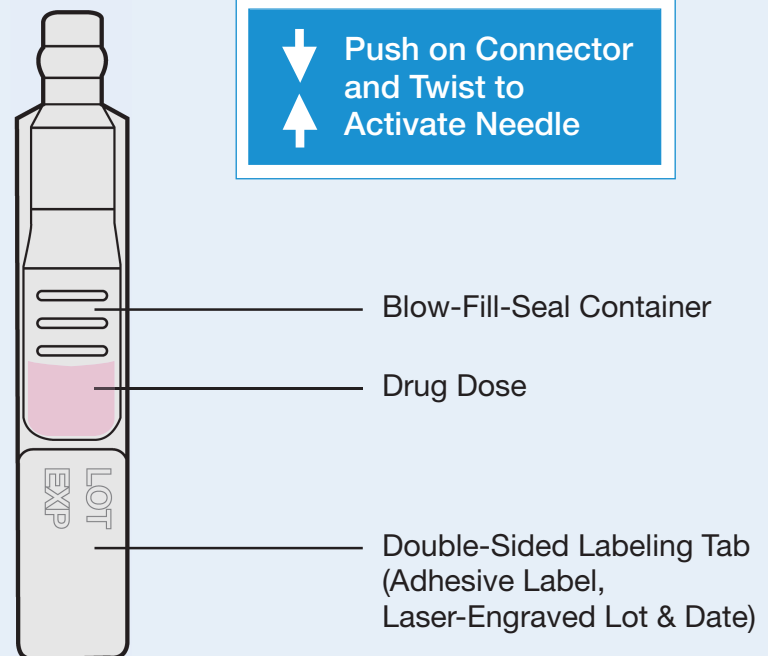

#### Manufacturing Process

- Blow-Fill-Seal
- Aseptic Filling

#### Quantity (per BFS line)

- 1,000 - 25,000 per hour

*Manufacturer chosen by drug partner (ApiJect can advise)*

**\*Prefilled ApiJect Injector and Needle Hub have not been approved by regulators.**
